

Connect Telephone & Computer Group

*Giving Wells Fargo **THE POWER TO COMMUNICATE***

- Client:: Wells Fargo Bank Region 8 - Loan Operations Center
Homestead Business Park - Billings
- Project Description: Design and Install a high speed voice & data network utilizing Avaya Cat 6E Systimax cabling system and 32 strand multi mode fiber-optic backbone. This design provides 1.2 gigabytes of bandwidth to each desktop and is performance guaranteed for 20 years.
- Project Challenge: Install all network infrastructure components within a **9 week** job window: Over 140 miles of Cat 6E Avaya Systimax cabling and 25,000 feet of multi mode fiber-optic enhanced 10 gigabit fiber

As communications needs grow, Connect Telephone & Computer Group's technical resources, product expertise and performance-driven network solutions are called upon to control the efficiency and flexibility of complex environments. Dual fiber optic backbones, primary and secondary voice/data systems and Avaya Communications products provide Wells Fargo the redundancy, inter-office flexibility and security necessary in today's financial services business.

Connect's commitment to delivering robust technology tailored to individual business operations is exemplified by the partnering process used to achieve long term client objectives. If your organization relies on office communications technology, our integrated voice, data and video systems can assist in turning your business information resources into useable management and administrative solutions.

THE POWER TO COMMUNICATE
