

Connect Telephone & Computer Group to Speak at National Convention Showcasing U.S. and Canada's Top Telecommunications Providers

Matt Duray, Owner of Connect Telephone & Computer Group, to Offer His Industry Expertise During Technology Assurance Group's 2006 National Convention

BILLINGS, MT — December 15, 2005 — Connect Telephone & Computer Group, an industry leader in telecommunications, announced today that the company will speak at a national convention showcasing both U.S. and Canada's top telecommunications providers. Technology Assurance Group (TAG), an association of independently owned telecommunication companies, of which Connect Telephone & Computer Group is a premiere member, invited Matt Duray, the company's Owner, to share his industry expertise during a series of roundtable discussions. These discussions will cover a variety of hot topics impacting telecommunications and the global business environment. TAG's 2006 National Convention will be held March 8th – 10th in San Diego, California.

Hundreds of telecom professionals representing voice and data providers, major industry manufacturers, and trade journals will listen to Mr. Duray offer his valuable insight on issues facing communications technology, business processes, customer satisfaction, and corporate training.

The roundtable discussions are the most popular activity of the convention because it's an opportunity for open exchange of ideas and information.

"Mr. Duray's vast knowledge, experiences, and accomplishments in our field is quite impressive," stated Dale Johnson, CEO of TAG. "It will be an honor to have someone of his caliber address our Member companies at our largest event of the year. Everyone in attendance will be treated to a valuable learning experience."

"It is a great privilege to share our challenges and experiences with TAG members across North America," said Matt Duray. "Participating at TAG's annual event enables us to interact and learn better business practices from leading companies in our industry. We implement new ideas and approaches that not only improve our company, but provide cost-effective products and services to our customers. The TAG Convention presents us with an awesome opportunity to identify new technology solutions that give the companies we serve a competitive advantage, improved profitability, and a higher level of productivity."
